

INVACARE®
microAIR® MA50
SERIES THERAPEUTIC SUPPORT SURFACES

The **Invacare® microAIR® MA50 Therapeutic Support Surface** overlay is a full-featured alternating pressure overlay with four alternating pressure cycles to provide relief and comfort.

The **Invacare® microAIR® MA51 Therapeutic Support Surface** model is an alternating pressure mattress replacement system which helps reduce interface pressure to aid in the prevention and treatment of Stage I to IV pressure ulcers.

In addition to all of the features of the microAIR MA51 mattress, the **Invacare® microAIR® MA55 Therapeutic Support Surface** model improves air circulation and cools the body temperature with a unique system of low air loss released into the mattress.

Features

State of the art compressor – With solenoid valve system allows for easy set up and effective therapy cycles

Four therapy times – Can be adjusted for patient comfort to provide pressure relief

Constant pressure monitoring – Constantly monitors the air pressure in the mattress to maintain the appropriate pressure to prevent capillary occlusion (generally below 32mm/Hg)

Manual Fowler – When activated manually, 25% more air is automatically pushed into the mattress to prevent patient from bottoming out when bed is articulated

Audio and visual alarms – Warns the patient and caregiver during power outage or low pressure

Lock out button – prevents against tampering or accidental adjustments

Quick connect coupler – allows for quick and easy set up

Power outage safety – Mattress remains inflated during power outage as long as air hose is connected to the compressor

Pressure adjustment – Pressure can be adjusted by 25%, 50% or 75% to provide comfort for frail patients
